LEAGUE ISLAND

UNOFFICIAL information received yesterday in Washington indicates that the Philadelphia Navy Yard may yet come into its own. The Naval Survey Board which has been sitting to determine just where retrenchment should begin under the reduced appropriations is said to be ready to recommend further expansion at League Island. This is what an "inside" source might be expected to do when it is permitted to work unhindered by pork peddlers in Congress.

ANOTHER ROCKET FALLS

TOM LAWSON spread a great deal of virus that made red-tail speculators out of multitudes of people misled by temperament or experience for survival in the treacherous field dominated by stock gamblers. And now Mr. Lawson, after a zig-zag down in earth and sea, has come back to his disciples. His property is on the auction block and he is, in general way of speaking, broke. This noted professional has fared no better than the amateurs whom he led to the chopping blocks of Wall Street.

HAYES, UNSPECTACULAR

IT WAS consistent with the character of Rutherford B. Hayes that his last campaign, which occurred yesterday, should have passed quietly. Perhaps the least spectacular of all American Presidents, it was the strange fortune of Grant's successor in office to attain the chief magistracy in the closest national election ever held. In the absence of that bitter contest undertaken for some time, the reputation of Hayes' sober, solid and not very ostentatious administrative abilities. There it is true, were unspectacular, lacking in popular emotional appeal. But Hayes was neither an austere President nor a moderate.

WHERE COAL COSTS MOST

YEARS ago crippled children were practically nonexistent in the coal regions of Pennsylvania. They were for the most part little boys who, having lost one or both legs, had the parents and grandparents gathered round them and indulged in their protest themselves against the lack of attention that often was too much even for the eyes of men. They were carried under their arms or in the folded robes in which coal is crushed to be sold and shipped.

THE DRY NAVY'S EXPLOITS

THE DRY NAVY, of whose exploits and intended conquests we have been hearing so much, came into being, as you might say, on a tip. No one seems to know much about it. Its status, like its authority and its methods, is shrouded in mystery. The nature of its operations and its system of practice and its theories of diplomatic procedure are more or less uncertain and indefinite.

run aboard. For answer the steamship moved swiftly away, leaving the Newberry immovable in astonishment, and was lost, as the dispatches say naively, in the wilderness of shipping of the inner harbor. While the suspected ship was departing the Newberry fired eleven shots from her one-pounder—and missed!

PINCHOT IS SEPARATING SHEEP FROM THE GOATS

Shows Sincerity in Exposing False Pretenses of the Legislative Candidates Secretly Opposed to His Program

GIFFORD PINCHOT seems to be acting on the theory, novel to most politicians, that the voters have a right to know where every other candidate on the Republican ticket stands on the issues of the campaign as well as where he stands.

TURKEY, A NATION

ALLIED diplomats are plainly of the opinion that the price of peace in Europe is the restoration of the Turkish Empire. Neither the Government nor the Nationalist delegates at Mudanya are finding the allied proposals acceptable. Kemal is a shrewd tactician and he would have belied his reputation by overplaying his already brilliant hand.

SOME FOOL AMERICANS

A Certain Class That Should Be Kept at Home—They Are an Injurious Example

By GEORGE NOX McCAIN
THERE is one class of Americans who should never be permitted to leave our shores. They are a reproach to the country and an embarrassment to their countrymen.

NO TASTE FOR WAR

"No, at the present time there is no taste for war. Comparatively light as are the casualties in the American forces, there is yet seriously a circle in which death has not claimed some victim or whose future has been brightened by disabling wounds.

Work of the Women

"The women of the world took one of the earliest steps to this end, and they are determined that the matter shall not be allowed to drop until the world for results are achieved. They are now many who have realized that every effort must be made to avoid a repetition of that terrible time.

ful tales of war wages in the coal region, the Department of Labor reports that the average best day's pay for anthracite mine workers in the Schuylkill region during the year 1919 was from \$4 to \$5. Virtually all miners and mine workers lost time—as they still do—because of market changes, fluctuations of demand, or shortage and the interruptions of mine operations. Only about 5 per cent of the miners had incomes of \$1850 a year or more.

President Harding, when he sought from Congress power to establish a fact-finding coal commission, like Secretary Hoover when he first called for attention to the coal situation, was clearly aware of the fundamental difficulties that harass the miners in the coal field, the general public and, in a lesser degree, the operators themselves. It was not thinking primarily of money costs or wages, but of the necessity of stabilizing the mining industry and of a sort of basic reorganization which would insure the miner opportunities for regular work, or, if not that, the sort of advance information which would lead him to another occupation.
